Technical Skills:

Programming Languages	: Ruby and Java.
Web Technologies	: HTML, CSS, JavaScript, jQuery, and AJAX.
Databases	: MySQL, PostgreSQL, and Oracle.
Servers	: Webrick, Unicorn, and Tomcat.
Cloud Services	: Heroku and AWS.
Version Control Systems:	Git

Operating Systems : macOS, LINUX, and Windows.

Project Experience:

Project 1:

Project Title	:	Confidential
Url	:	https://***.***.apple.com
Platform	:	Ruby on Rails
Team Size	:	10
Duration	:	Oct 2019 to till date

Description:

This project is to manage and maintain the resources working for Apple maps.

Technology Stack: Ruby On Rails, MySQL, Bootstrap, Ember.Js, jQuery, and AJAX.

Responsibilities in this project include:

- Fixing bugs reported by Client or any other end user of the application.
- Implement/Enhance the existing functionality to reduce the manual work done by end users.
- Maintaining data in the database, coming from different sources into the application.

Project 2:

Project Title	:	RetroTax
Url	:	https://www.retrotax-aci.com
Platform	:	Ruby on Rails
Team Size	:	12
Duration	:	Jan 2017 to till date

Description:

RetroTax is all about tax credit administration. RetroTax is a full-service administrator of federal and state tax credit and incentive programs for businesses. It maximizes the tax benefits to their client.

Technology Stack: Ruby On Rails, MySQL, Bootstrap, AngularJS, Node.Js, jQuery, and AJAX.

Responsibilities in this project include:

- Implemented APIs for the application. Integrated jazzHR and Zenefits API with RetroTax system.
- Implement functionality using Selenium Webdriver that retrieve employee records from US tax related sites.
- Implemented features like elastic search, pdf file generation, sftp file uploads, aws recognition, tracking changes in models, csv generation, checking of address for the geo-qualification, etc.

Project 3:

Project Title	:	EasyCarrier
Url	:	https://app.auscarrier.com.au

Platform	:	Ruby on Rails
Team Size	:	2
Duration	:	September 2016 to December 2016

Description:

EasyCarrier works for Shopify (platform for online stores and retail point-of-sale system) based business to provide real-time shipping rate calculation. It uses Fastway and Australia Post APIs for rate calculation.

Technology Stack: Ruby On Rails, PostgreSQL, Bootstrap, JavaScript, jQuery, and AJAX.

Responsibilities in this project include:

- Involved in project analysis and design phase.
- Involved in weekly meetings to give the status of the project and to get the clear understanding of the requirements by following the Agile development process.
- Involved in designing the project scope and project documentation.
- Involved in implementing almost all the major features like API interaction, Admin portal and User authorization and authentication, etc.

Project 4:

Project Title	:	EliteTeam
Url	:	http://www.eliteteam.co/
Platform	:	Ruby on Rails
Team Size	:	4
Duration	:	May 2016 to July 2016

Description:

EliteTeam is an online platform to collaborate with your team and manage your project, like JIRA. It's developed for project tracking. This product makes the communication among teams very effective.

Technology Stack: Ruby On Rails, MongoDB, Bootstrap, JavaScript, jQuery and AJAX.

Responsibilities in this project include:

- Involved in modifying every layer of web application like Model, Controller and View.
- Investigating issues, fixing it with clean and maintainable code and writing test cases.
- Involved in implementing many of the major features like modifications in authorization and authentication process, emailing system, searching filters, pagination and image upload to S3, etc.

Project 5:

Project Title	:	Kangarootimes
Url	:	https://kangarootime.com
Platform	:	Ruby on Rails
Team Size	:	6
Duration	:	January 2016 to April 2016

Description:

Kangarootimes is an online platform for child care organizations, schools and behavioral health centers to run their center.

Technology Stack: Ruby On Rails, MongoDB, Bootstrap, JavaScript, jQuery, AJAX.

Responsibilities in this project include:

- Wrote smart and efficient code, by following rails best practices in every layer of web application with minimum time.
- Involved in implementing most of the major features and code refactoring.
- Implemented background jobs. Handled blog module individually.

Project 6:

Project Title	:	Tutorsweb
Url	:	https://www.tutorsweb.com
Platform	:	Ruby on Rails
Team Size	:	6
Duration	:	June 2015 to December 2015

Description:

Tutorsweb is a collaborative online educational platform for tutors to work with students in an interactive learning experience. Tutors Web is a web based platform that provides class education to students helping them to interact directly with their tutors, take notes and ask questions.

Technology Stack: Ruby On Rails, PostgreSQL, JavaScript, JQuery and Haml.

Responsibilities in this project include:

- Implemented features like Role management, RSS feed implementation, Sitemap integration, Disqus and Mail Chimp integration, etc.
- Converting hard coded html pages into working ruby application.
- Writing migrations, as well as improving the user interface. Involved in bug fixes reported by client.

Extracurricular activities:

- Got certificate of AWS AWSome Day Conference.
- Got Soft Skills certificate from Hitachi Consulting Services.
- Attended workshop on C-language by IBM.
- Attended seminar on Data Warehouse & Cloud Computing by J.P.Morgan & Chase.

Personal Details:

Father's Name	:	Ashok Kumar Singh
Date of birth	:	16 th October 1990
Gender	:	Male
Marital Status	:	Married
Languages Known	:	English and Hindi.
Hobbies	:	Listening to music and Internet surfing.

Date: 15-06-2020

Place: Hyderabad
